How To Charge

 The Atomic Lighter[™] should be fully charged before first use. Plug the micro-USB connector end of the supplied USB cable into the charging port of the Atomic Lighter[™]. (Figure A) Connect the other end of the cable into a USB port of a power source.

2. While charging the blue light will blink, indicating the Atomic Lighter™ is charging properly. When charging is complete the blue light will be solid. Make sure to remove the USB cable both from the charging port of the Atomic Lighter™ and from the USB port of the power source after the Atomic Lighter™ is fully charged. Over-charging the battery can cause poor battery life. When in use, a flashing blue light means the battery is low. (Figure B)

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and

(2) this device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the Instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.

· Increase the separation between the equipment and receiver.

Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio/TV technician for help.

LIMITATION OF LIABILITY Liability limited to the purchase price of this product. Supertek Canada Inc. shall not be liable for any incidental

or consequential damages or any implied warranty on this product.

How To Use

 Locate the ON OFF switch located on the bottom of the Atomic Lighter[™]. Slide the switch to the ON position to unlock the lighter. (Figure C) Having the switch in the OFF position will lock the lighter and make it unable to turn on.

Cleaning

 Over time, some build-up will occur around the tips. (Figure E). To clean this area, use a soft small brush to clean away the build-up. Make sure the lighter is in the OFF position while cleaning.

Note: Do not use any abrasive or liquid cleaners.

- 2. Press and hold the power button to turn on the lighter. (Figure D)
- Note: As a safety precaution, electric arc will only remain on for 8 seconds, even when power button is depressed.
